## Resume Objective

---

Innovative Mobile and Web Developer with expertise in React Native, Laravel, and Firebase. Passionate about building high-performance applications, optimizing user experiences, and implementing scalable solutions. Strong problem-solving skills with a focus on efficiency, security, and modern UI/UX principles. Dedicated to delivering impactful digital solutions that drive business success.

## Education

---

**Trinidad Municipal College**  
*BS in Information Technology*

*Aug 2022 – June 2026*

## Experience

---

### Mobile Developer

*JB Celltech*

*Alicia, Bohol*

*Jan 2025 – Feb 2025*

- Developed and optimized JB CellTech Installment, an offline React Native app using SQLite for managing client installment records.
- Improved data retrieval speed by optimizing SQLite queries, reducing load times by 75
- Integrated advanced search functionality, enabling efficient filtering of customer installment records.

### Website Developer

*Local Carinderia*

*Trinidad, Bohol*

*Sept 2024 – Oct 2024*

- Developed a responsive online food ordering system using vanilla PHP, Bootstrap, and MySQL for a seamless user experience.
- Designed and implemented a user-friendly UI to enhance navigation and order processing.
- Optimized database queries for efficient order management and reducing response time.
- Integrated automated order tracking and real-time updates to improve efficiency.
- Ensured security and data integrity through proper input validation and database protection techniques.

## Projects

---

### JB CellTech Installment App

[github.com/android/app](https://github.com/wangD-e-v/android/app) 

- Developed an offline installment management system specified in Android.
